

TODOS ARGOS MINI II

Small and light smart card reader/writer

- Secure identification
- Digital signature
- Internet Banking/ Shopping
- Access Control
- Loading Electronic Purse

Secure Identification and Digital Signature

Secure identification of the end user and secure data transmission require smart cards of different security levels. Todos Argos Mini II handles everything from memory cards to the most advanced asymmetric smart cards for Digital Signatures within a PKI environment.

Cost efficiency

Todos Argos Mini II is a cost-efficient smart card reader for applications like Secure Identification (eID card), Internet Banking/Shopping (EMV cards), Access Control, Loading Electronic Purse etc. Argos Mini II has a flat design and weighs less than 100 grams in an envelope, thus it is optimised for mass distribution by ordinary mail. Minimum need for support due to full Microsoft Update compatibility ensures a low life cycle cost.

Ergonomy

Todos Argos Mini II is very small, thin and light, need almost no desk space at all. Rubber feet for a steady grip.

Easy to install

Todos Argos Mini II is easy to install. Simply plug in the USB cable to your computer. Argos Mini II is certified by USB and listed at www.usb.org. Argos Mini II has also been approved by Microsoft Windows Hardware Quality Labs meaning that necessary drivers are supported by Windows Update and available through Windows for 2000/ME and XP. The USB port provides Argos Mini II with sufficient power for reading/writing all types of smart cards.

OEM/ODM

We can offer OEM/ODM co-operation for the Todos Argos Mini II smart card reader if requested.

High quality to competitive prices
